THE NINE MONTHS AFTER

The nine months after of four very different mothers were told with sensitivity by Mariagrazia Contini, Paolo Marzoni and Vito Palmieri, in a documentary produced by IBC Movie, in collaboration with RAI Cinema and the support of the Emilia-Romagna Region.

The documentary gives voice to the distress that many mothers experience in the nine months after the birth, when it seems that there are no reasons to feel it, since the "game of misunderstandings" (social, cultural) ignores it and imposes emotions in its place only positive. How to get out of that script? How to say the fear of not succeeding?
