Abstract

The abstract is the overview of your thesis and will generally be 2-3 pages long.

Please also remember that you need to **register for graduation**, within the deadlines set up for each graduation period (<https://www.unipd.it/en/graduation>), communicating the name(s) of the tutor(s) and the final title of the Dissertation.

At the same time, you should communicate to the Director of the course and the Academic Board the language you want to adopt (usually English).

If the thesis is in English, an extended abstract in Italian must also be included.

Introduction/objectives/aims of the thesis

Normally, the chapters of the dissertation will be organised as follows: 1) the introduction, which will describe the aim of the work and the background; 2) the state of the art, with the context of the site or the materials; 3) a detailed description of the samples; 4) the experimental methods employed; 5) the results obtained; 6) discussion; 7) conclusions.

The structure of the chapters of the thesis may vary, but the topics and the information must be present.

If the thesis presents a large number of data, they may be inserted in the appendix.

Ideally, the dissertation will have between 50 and 100 pages (excluded the appendices).

References

References must be cited in the text, with the author's last name, followed by the year of the publication. All bibliographic references in the text will be collected in a final bibliography, in alphabetical order, with the last name first, followed by the author's first name initial, and the year of publication; if more than one publication by the same author, published in the same year, is cited, a lower-case letter will be added to the date. In the case of more than one Author, these will be separated by a comma (CHOUQUER G., FAVORY F. 2001).

The year of publication will be followed by a comma, the title of the volume/paper (in Italics) and the place of publication. In the case of miscellaneous works or journals, the initial and final page numbers will be added, as well. In the case of works made of more than one volume, the indication 'vol., voll.' will be omitted, and it will be sufficient to indicate the number of the volume (in Arabic or Roman numerals, as appropriate; 2 or II) or the volumes which made up the work (1-5 o I-V).

Websites must be inserted in the text when cited, e.g.: (www.unipd.it).

Please try to avoid footnotes.
