

Some case studies of geophysical exploration of archaeological sites in Spain

Prof. Em. ALBERT CASAS
University of Barcelona
Spain

Professor of Applied Geophysics since 1th October 1972 and actually Emeritus Professor at the University of Barcelona. Extensive experience in collaborating on relevant archaeological projects. Among the most relevant, Empúries, Pollensa and Sa Nitja (Menorca), cathedrals (Chartres, Tarragona, Girona and Barcelona), city walls (Lugo, Barcelona and Tarragona), necropolises (Sant'Antioco and Capo San Marco in Sardinia), castles (Alcazaba de Ronda, and Ibiza), thermal baths (Caldes de Montbui and Lugo) and potteries (Ermedàs and Navés).
